# Description

Description:

Štinjan is a suburban settlement in the system of the city of Pula. The settlement includes suburban tourist areas with beautiful beaches such as Puntakristo,

Puntižela and Monumenti and the islands of Sv. Jerolim, Kozada and Sv. Catherine. In recent years, Štinjan as a settlement has become increasingly popular among numerous visitors, both domestic and foreign. This beautiful urban and modern villa is located in this beautiful and peaceful settlement in a newly built modern and luxurious complex. The house consists of a ground floor on a plot of 304.03m2. On the ground floor of the house there are two bedrooms with private bathrooms, a large kitchen with dining room and living room in the "open space" system, as well as utilities and storage space. From the living room there is access to the terrace and to the swimming pool with all the accompanying equipment and the sunbathing area. The first floor of the house is accessed by an internal staircase and there are four spacious bedrooms with bathrooms and access to two covered balconies. The construction of the building itself takes place according to the highest current construction standards with maximum emphasis on safety and, ultimately, maximum energy efficiency of the building. The interior decoration will take place in certain stages, and the future buyer will be able to choose different heating and cooling options, floors as well as other important features of the future home, all by agreement with the investor. Taking into account the location itself and especially the microlocation of the real estate, i.e. its position in one of the most attractive residential areas in Štinjan and exceptional quality construction, this house represents a perfect investment for buying a real estate for a comfortable life or for tourist purposes and a faster return on invested funds.
