Description

Description:

ISTRIA, PULA - Apartment building in a quiet and interesting location Pula is the largest city of the Istrian County located in the southwestern area of the impressive landscape of the Istrian peninsula and is characterized by an interesting cultural and historical heritage, beautiful nature and long beaches that take your breath away. The city developed partly under and partly on seven hills. A moderately warm climate with mild winters and warm summers prevails, so it is an ideal place for potential property owners who will be able to enjoy them all year round. Only 5 minutes drive from the city center in a dead-end and quiet street, there is a detached building with 2 smaller and 2 larger two-story apartments. It is organized in such a way that there are two smaller residential units on the ground floor, each with 2 bedrooms, bathroom, kitchen, dining room and living room with access to the terrace. On the first floor there are two additional two-story residential units; The 1st apartment on the first floor consists of 1 bedroom, bathroom, kitchen and living room with access to the balcony, while in the high attic there are 4 more bedrooms and one bathroom. The second apartment on the first floor also consists of 1 bedroom, bathroom, kitchen and living room with access to the balcony, and on the second floor there are 3 more bedrooms and 1 bathroom. The entire building is equipped with gas central heating as well as each residential unit with one air conditioner. Each apartment has its own meter for gas and electricity, while it is possible to install control meters for water, the same was foreseen by the owner. A parking space is provided for each apartment in the building's yard, but the same building has another smaller part of the green area of approximately 120 m² that can be used as an extension of the parking lot, children's playground or similar. Due to its location and equipment, it is an excellent opportunity for all those who are looking for a building for rent or as an option for dividing residential units and potentially reselling them.
