Heating

Heating type: air-conditioner

Description

Description:

ISTRIA, POREČ - New construction only 800 m from the sea with a beautiful view! The city of Poreč, one of the most beautiful pearls of the Adriatic Sea, is located on the west coast of Istria. On the relatively small peninsula area where the city arose, traces of the meeting of the Slavic, Romanic and Germanic worlds are still clearly visible today, which at the same time bear witness to the multitude of changes - political, social and ethnic - that this Istrian town has experienced in history. The history of Poreč is a history of constant changes, movement and turmoil, the impermanence of the people, ups and downs, in which the history of new beginnings appears as a constant. This city constantly reveals traces of the life of many civilizations and cultures that built its urban and historical identity Poreč, in its history of about two thousand years, remembering happy but also difficult times, has grown into a promising and pleasant city to live in. It has based its development in the last fifty years on the tourist offer, building the image of one of the largest tourist centers in Croatia, so today it rightly bears the title of the metropolis of Croatian tourism. Right in Poreč, just 800 m from the beautiful beaches and the old town, this new project with a total of 30 elite apartments spread over four floors is located. The apartments that will be built as part of the project will be one-, two- and three-bedroom apartments with an area of 50 m² to 150 m². All apartments will have spacious and covered balconies with an unforgettable view of the sea and the city of Poreč. The building will be equipped with an elevator leading to the garage as well as to each floor. The decoration of the building, both external and internal, will meet high construction quality criteria as well as a high energy certificate A+: thermal facade system, storey heating and cooling system with inverter air conditioners, high-quality Italian ceramics and laminates, entrance security doors, residential carpentry made of high-quality PVC/ALU materials and electric floor heating in bathrooms. It is also planned to plant Mediterranean plants and trees, which will raise the entire project to a higher level of horticultural landscaping. Apartment A306 is located on the third floor of the building, with a total area of 54.52 m² and consists of an entrance hall, kitchen, bathroom, living room, bedroom and balcony. The apartment also has a parking space. The completion of the project is scheduled for March 2025. **DIRECT CONTACT WITH THE AGENT:** Agent: Nikola B.
