rich artistic heritage. Visitors can explore a variety of exhibitions and workshops by local artists, further enriching the cultural experience. In addition, Labin offers beautiful natural attractions. The surrounding landscape abounds with green hills, olive groves and vineyards, offering numerous opportunities for walks and cycling. Not far from the city is the popular tourist destination of Rabac with beautiful beaches and crystal clear sea, ideal for relaxing and enjoying the sun. The stone villa is located on a slope with a panoramic view. Located in the rural surroundings of the Istrian peninsula, this house combines rustic charm with elegant details, creating an idyllic atmosphere. Its massive facade of ancient stone makes it irresistible and imposing, while its history seems to radiate from every stone, inviting you on a journey through centuries of Istrian heritage and tradition. It exudes the charm and authenticity of the Mediterranean landscape. It was carefully reconstructed in 2023, and every detail was taken care of during the reconstruction. Natural materials are used: stone, wood, metal. As soon as you enter the house, you immediately feel the luxury. A large hall dominated by metal stairs, a stone wall and a high ceiling that extends through all floors of the house, up to the attic. In addition to the living room with a beautiful fireplace, we also have a kitchen with an open fireplace and direct access to the perfect terrace; toilet and engine room. On the first floor, on the left side, there is another living room with a high ceiling, a bathroom and a bedroom on the gallery, which is reached by metal stairs. On the same floor only on the other side, we have another bedroom with its own bathroom. Metal stairs lead to the high attic where there is another bedroom and bathroom. Next to the main house there is also a guest house where on the ground floor there is a living area with a kitchen, living room and bathroom, and on the first floor/gallery a bedroom with access to a terrace with a panoramic view of the surrounding hills. In the extension of the guest house, there is also a SPA ZONE glazed with large glass walls and equipped with a sauna, bathtub and shower area. Throughout the entire ground floor of the house, underfloor heating and fan convectors are installed, which are built into the walls and serve for heating and cooling. Fan coil units are installed on the other floors. The entire furniture was made according to the plans for this villa. The property is located on a plot of 1,800 m², which is completely landscaped with a combination of indigenous plants, lawns and a gravel access area.
