Description

Description: Kaiser Immobilien presents a unique project with a view of the entire central Istria. The location of this luxury project is in the central part of Istria, more precisely a small town above Lake Butoniga and near the beautiful Motovun, a popular tourist destination. These lands are slightly separated from the town itself, which gives them a very peaceful and relaxed atmosphere. We can call this project a refuge in peaceful nature. Land for three modern villas with a pool on a beautiful hill, at 460 m above sea level with a 360-degree view of the Istrian landscape on one side, and Učki on the other, Istria is literally in the palm of your hand. On building plots of 1,370 m², 1,265 m² and 1,239 m², building permits were obtained for family houses of 410 m² gross area, with a heated pool of 56 m² gross area. The ground floors are designed as spacious open living rooms, kitchens, dining rooms, which are connected with several glass walls to the exterior where there are beautiful

multi-level swimming pools. In that ground floor there is also a wellness area. The sleeping area is designed in "towers" on the first and second floor, in six sleeping units, each with its own bathroom. Each bedroom will be designed for comfort and peace, offering stunning views of the landscape. From the "towers", in addition to the beautiful view of the outside landscape, an inward view of the green extensive roof that covers the first floors is envisioned. The overall interior is designed in a very modern way, while still following the basic ideas of the Istrian region. All expenses are paid, and construction can start immediately. The owner has all offers for the completion of the construction, including horticulture and interior decoration. It is planned to build houses with floors P+2, with a large living room and kitchen, a wellness/sauna area, and a total of 6 bedrooms (2 master bedrooms), each with its own bathroom. Heating and cooling will be provided by a heat pump that will be connected to underfloor heating and fan coils. Installation for a photovoltaic power plant (solar panels) to produce electricity is planned. These modern villas, apart from the basic things it will have premium amenities such as smart homes, climate control and security measures to ensure comfortable and safe living. Access is from an asphalt road with sewerage infrastructure underneath. 4 parking spaces are provided on the plots. For all information, contact your agent.
