Description

Description:	<p>Agricultural land with an area of 4284 m² in Malinska offers excellent opportunities for different agricultural activities. Given its size and its registration as pasture in the title deed, this land may be ideal for crop cultivation or livestock farming. With dimensions of 51 metres in width and 86 metres in length, the parcel has enough space for different types of crops or livestock. Access to a white-road parcel facilitates logistics and transport, which is essential for agricultural operations. The distance from the sea of 2500 metres provides practical access to water and other resources needed for agricultural production, while the proximity of the sea may also constitute an additional advantage for the development of tourist facilities where permitted under local regulations. This land offers a variety of possibilities for use, either for traditional agriculture or for the potential development of rural tourism. Given its attractive location in Malinska, this land can be an excellent investment opportunity for those interested in agricultural production or rural tourism development.
