Description

Description:

SAINT LOVREC - ISTRIA Sveti Lovreč is a small village located in the interior of Istria, between Poreč and Pazin. It carries the charm of the past, which is felt at every step of its stone streets. This small town, surrounded by olive groves and vineyards, preserves its rich history behind well-preserved medieval walls. Near the historic St. Lovreč, a modern house from 2024 is located, which with its contemporary design and comfort offers an ideal refuge from everyday stress. This new building, located on a spacious plot of 790 m², exudes luxury and thoughtful layout, providing a perfect blend of natural surroundings and modern living. The house extends over two floors - ground floor and first floor - and has been carefully designed to meet all the needs of modern life. Each room exudes spaciousness and light, and the large windows offer a beautiful view and allow plenty of natural light throughout the day. On the ground floor of the house there is an elegant kitchen with a dining area, equipped with large sliding walls that open the space to the outside area with a heated pool measuring 9 x 4 meters and a fully equipped summer kitchen. The living room, located next to the kitchen, is ideal for relaxing, and is warmed by a fireplace that creates a pleasant atmosphere. On the ground floor there is also a bathroom with a toilet for guests, a spacious bedroom with its own bathroom, and a practical laundry room. Large sliding walls in the kitchen, living room and bedroom allow direct access to the terrace with the pool, where you can enjoy the outdoor space all year round. The first floor of the house offers three additional bedrooms, each with its own bathroom, which ensures privacy and comfort for all family members or guests. The two terraces on the first floor offer a wonderful view of the surroundings and offer the perfect place for morning coffee or relaxing at sunset. The house is equipped with underfloor heating on a heat pump, air conditioning inverters (1 outdoor unit and 5 indoor units), solar panels for hot water and electricity, as well as PVC carpentry with mosquito nets and automatic blinds, which guarantees high energy efficiency and comfort. In addition, there is video surveillance, two covered parking spaces with a charger for electric cars, and two additional uncovered parking spaces. The 30 m² outdoor pantry provides additional storage space. It is important to point out that the house has all the necessary documentation, including a building and use permit and an A+ energy certificate, which guarantees its quality and energy efficiency. Ownership is neatly 1/1, which provides additional security to future owners. This house is not only a place to live, but also an opportunity to enjoy the peace and beauty of the Istrian nature, with the proximity of all facilities offered by Sveti Lovreč. It is ideal for those looking for a perfect balance between modern comfort and natural idyll.
