Permits

Location permit:	yes
Ownership certificate:	yes

Description

Description: A beautiful construction location with a project in the Žukova bay, with an indented bay and great nautical potential, 2 kilometers from Stari Grad, and 3 nautical miles from Bol on Brač. It is a unique location that has not yet been devastated by construction, and considering the configuration of the terrain, all buildings can be built so that they have a view of the sea, which is a great imperative when selling future real estate. It is very important that a detailed urban planning plan has been adopted in that area, which means that it is possible to start developing the project and then request a permit. In addition to family houses, residential, residential-business, business and hospitality-tourism buildings (hotels) with accommodation capacity of up to 80 beds can be built as part of mixed use. The number of floors for multi-residential, business and commercial buildings can be: Floor + Floor + 2, that is, four floors, consisting of a basement, ground floor and two floors, and a flat roof as a functional panoramic terrace. Part of the parcels can represent the future functional garden of buildings with planned different contents - an open terrace and an outdoor bar, a summer stage, a children's playground, outdoor sports facilities, a Mediterranean park. While part of the particles represent the beginning of the future corridor to the sea, independent of the public road - a panoramic promenade to the landscaped and concessioned

beach. As part of the residential purpose, the construction of family houses and semi-detached houses with a maximum of 3 separate apartments is allowed, within which, in addition to housing, business activities can be carried out - tourism, trade, catering, etc. The maximum height for family buildings outside the protected zone of the settlement is 4 floors - Po+1+Pk, i.e. max. 8.5 m high. The size of the construction plot is determined for family houses and other buildings from 500 m² to 2000 m², and for semi-detached buildings from 400 m² to 1000 m².
