upper floor where the bedrooms and bathrooms are located. From the lower floor we access a large covered terrace with barbecue and a large table for dining and socializing. In the continuation of the terrace we come to a large pool around which there is plenty of space to enjoy and sunbathe. The house was built in 2015 and most of it is made of quality and famous "Kanfanar" stone. The house has two secured parking spaces and there is a possibility of additional parking next to the fence of the house since it is located at the end of the street next to the forest. The property is certainly noteworthy for several reasons, from the location itself, which is in an extraordinary position, to the small details that were given attention while the building was being worked on. An excellent villa that can become an ideal home or can be used for tourist purposes in which it is currently located and achieves enviable results.
