Description

Description: The villa stands out for its unique modern design enriched with authentic stone details and wooden elements, which results in an ideal combination of elegance and functionality that fits perfectly into the natural environment. Contemporary lines and shapes blend elegantly with natural elements, creating a harmonious blend of tradition and innovation. Large glass surfaces allow plenty of natural light into every corner of the room. This approach not only emphasizes the feeling of spaciousness, but also harmonizes the interior with the surroundings. An essential

part of the modern concept are the openings on the roof, which extend along the stairs, enabling not only natural light but also a special feeling of freedom and connection with the atmosphere and natural environment. Openings on the roof provide an opportunity to observe the starry sky at night, creating a unique atmosphere. The infinity pool is the central element of this modern villa, creating the illusion of merging the water with the sky or the sea horizon. One wall of the pool is made of transparent glass, creating an exceptional visual effect. Next to the pool, separated only by thin transparent glass, there is a fireplace, an addition that enriches the ambience of the villa. A fire pit, located at pool level, provides warmth and a romantic atmosphere, creating the perfect place to relax and socialize. At night, the play of flames on the glass wall of the pool creates an enchanting light effect.
