Description

Description:	<p>The small tourist town of Barbariga is located on the west coast of Istria and is located halfway between Rovinj in the north and Pula in the south from which it is equally distant - approx. 20 kilometers. The place is surrounded by untouched Mediterranean macchia and numerous olive groves. In its vicinity is located this beautiful house that extends through the ground floor and first floor. The ground floor has a hallway, bathroom, pantry and open space kitchen and living room. The living room opens onto a covered terrace. Internal stairs lead to the first floor where there are three bedrooms with bathroom. Two rooms have a balcony, which offers a beautiful sea view. The planned completion of construction is in 2022. This Istrian villa is made according to the modern standard method of construction - with bricks, and then instead of the facade comes a stone cladding that gives the impression that the house was built of stone. The advantage of this type of construction is the excellent insulation of the house, which is additional insulation between brick and stone. . Underfloor heating was carried out throughout the house according to the heat pump system. The house has a swimming pool of 24 m² with sun deck. The property is certainly noteworthy, an attractive investment for investment for tourist purposes, and since it is close to all necessary facilities ideal for family life. ID CODE: 66979</p>
