Description

Description:	Šišan is a village 7 km east of Pula, known for its beautiful beaches and clean and clear sea. Gradina settlements in the vicinity, as well as numerous finds of architectural parts, sarcophagi and inscriptions confirm the settlement of the area in prehistory and antiquity. In the very center of Šišan, there is a house on a plot of 346 m ² . It consists of a hallway from which you enter the kitchen on the left, the living room on the right, and a bathroom under the stairs. A wooden staircase leads to the first floor, where there is another bathroom and four bedrooms, two double and two single. The combination of a stone wall and an old wooden beam are the
--------------	---

basic elements with the taste of the decorated interior. The entrance to the house is covered and in the corner is a summer kitchen equipped with barbecue, stone sink, and the fronts of the cabinets are made of Siberian larch, a tree known for longevity and durability in various conditions. The yard is full of greenery, fruit trees, low Mediterranean vegetation, and the paths are paved with slate. In the middle of that greenery is a 3x5 prefabricated pool. At the bottom of the yard there is a large garage with all installations (water, electricity) of 36 m2, and a garden wooden house. The house has a well-established and profitable rent, so it is an attractive investment for investment purposes, and given the delicately decorated interior of this house give peace and warmth, therefore ideal for family life.
